2014 Poverty Thresholds

The U.S. Census Bureau uses the federal poverty thresholds to estimate the number of poor people in the United States. People in families with incomes below these thresholds are considered to be "living below the poverty line."

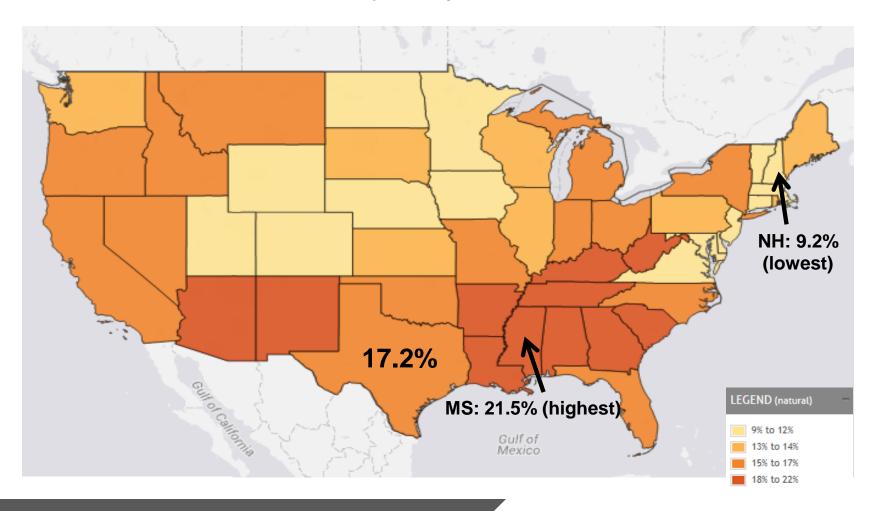

Size of Family	Poverty Thresholds (total annual income)
One person (under 65)	\$12,316
Family of Two (one adult, one child)	\$16,317
Family of Three (one adult, two children)	\$19,073
Family of Four (two adults, two children)	\$24,008

Slightly different from the thresholds, the Poverty Guidelines are used to determine eligibility for various government programs and services. To learn more, visit http://aspe.hhs.gov/poverty/index.cfm.

Supplemental Poverty Measure (SPM)

The SPM provides a more correct poverty measure since it takes into account benefits that help people meet basic needs, such as:

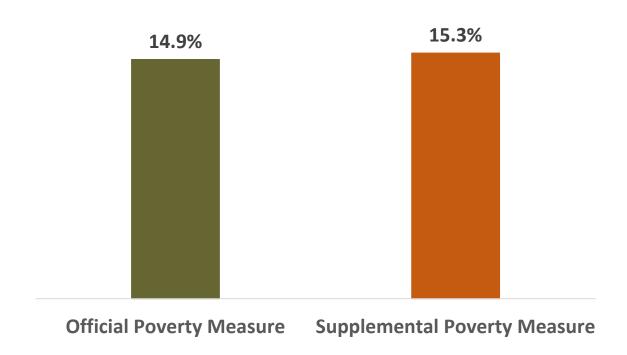

SNAP benefits (food stamps), Social Security, refundable tax credits (Earned Income Tax Credit, Child Tax Credit), housing subsidies

... and subtracts necessary expenses from income, such as...

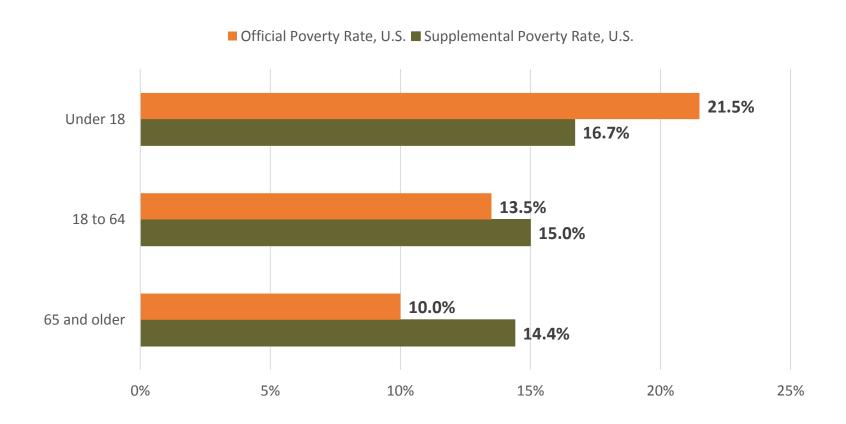

Taxes, work expenses, medical out-of-pocket expenses, child care expenses, child support paid

The Overall U.S. Poverty Rate Rises Slightly When Factoring in Benefits and Expenses

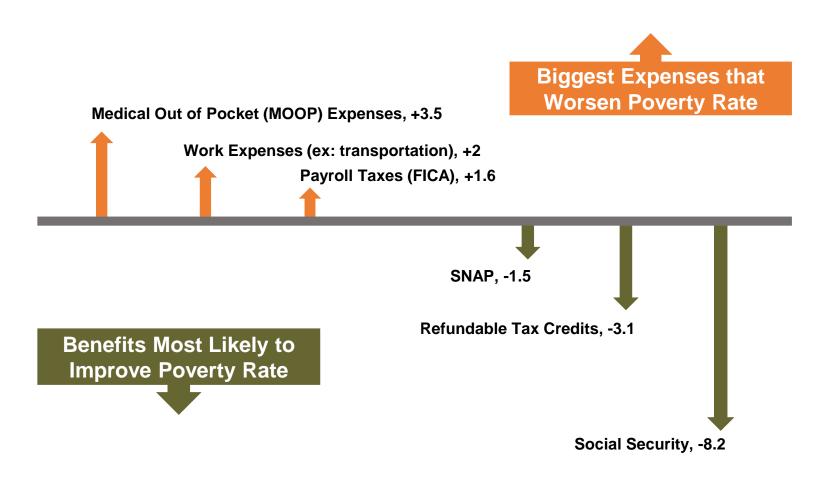

Under the Supplemental Poverty Measure (SPM), national poverty rates improve for children, worsen for adults and seniors

Social Security has the strongest anti-poverty effect under the Supplemental Poverty Measure

- 6. "Poverty thresholds are used for calculating all official poverty population statistics for instance, figures on the number of Americans in poverty each year. They are updated each year by the Census Bureau. Poverty thresholds since 1973 (and for selected earlier years) and weighted average poverty thresholds since 1959 are available on the Census Bureau's web site. For an example of how the Census Bureau applies the thresholds to a family's income to determine its poverty status, see "How the Census Bureau Measures Poverty" on the Census Bureau's web site. The poverty guidelines are a simplified version of the federal poverty thresholds used for administrative purposes for instance, determining financial eligibility for certain federal programs. They are issued each year in the Federal Register by the Department of Health and Human Services (HHS)." (http://aspe.hhs.gov/poverty/faq.cfm#thrifty)
