

Immigrants Drive the DALLAS ECONOMY

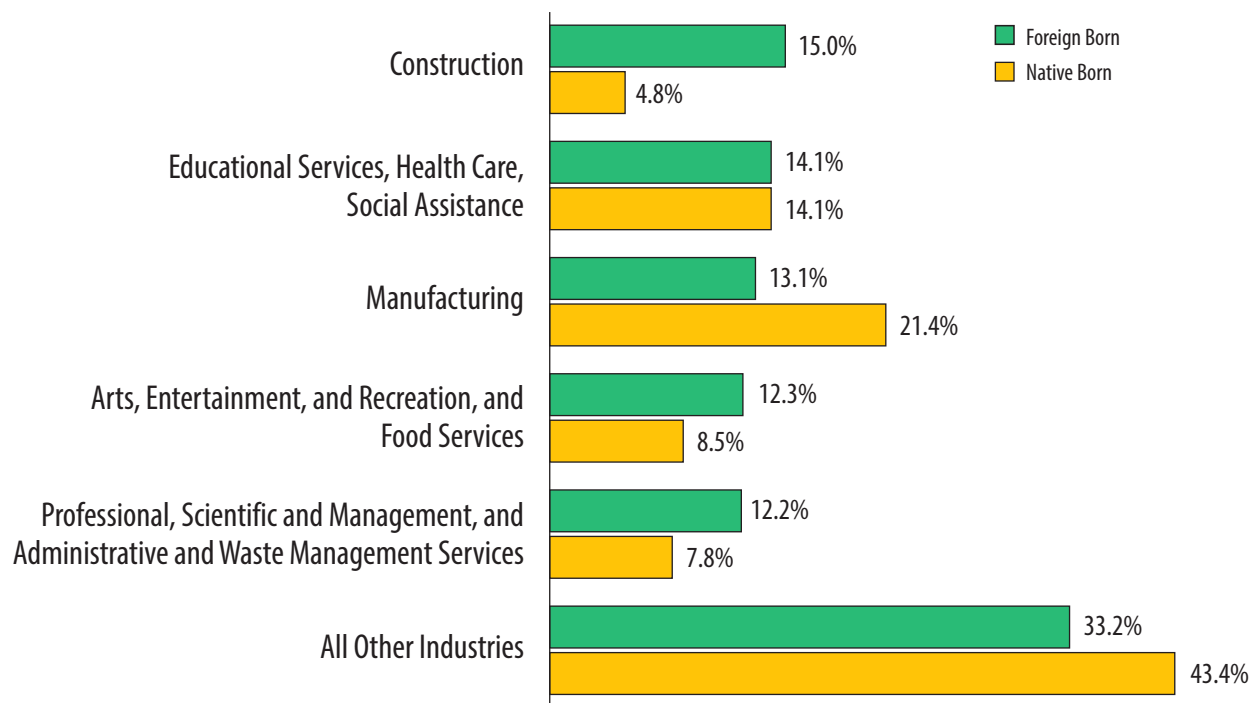

Dallas is home to over 850,000 immigrants (19.3 percent of the metro population). The immigrant population in Dallas represents close to 20 percent of the entire immigrant population in the state of Texas.¹

Immigrants have played a leading role in Dallas' economic success and make up 25.2 percent of the total metro division labor force. Dallas immigrants work in a wide range of jobs, most heavily concentrated in construction.²

Immigrants also power the Dallas economy as job creators, small business owners and entrepreneurs. Immigrants make up 19.6 percent of business owners with paid employees in the Dallas-Fort Worth-Arlington Metro Area,³ and are self-employed at a higher rate in Dallas (8 percent) than the Native-born population (5.6 percent).⁴

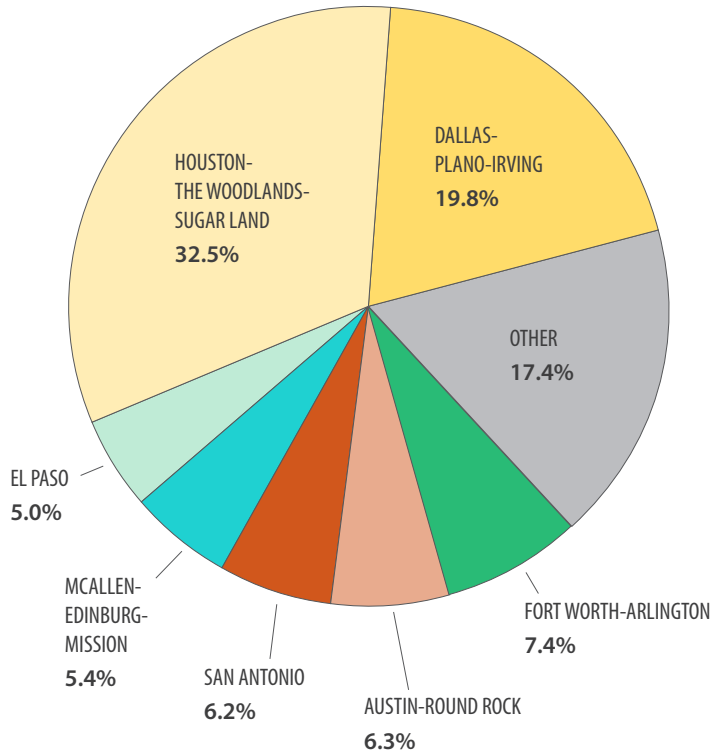

**This fact sheet refers to Texas immigrants as any foreign-born resident regardless of immigration or U.S. citizenship status. Dallas data in this report is for the Dallas-Plano-Irving, TX Metro Division.*

- 8 CPPP calculated the estimated range of potential direct purchasing power using PUMS foreign-born income data, 1-Year Estimate, 2015 American Community Survey, U.S. Census Bureau multiplied by the average annual expenditure rates from the 2015 Consumer Expenditure Survey, Table 1800. CPPP calculated the expenditure rates by dividing average annual expenditures by the average pre-tax incomes for the South (low end of range) and for the U.S. (high end of the range). The estimate includes average spending on housing, food, transportation, healthcare, and all other personal expenditures. For the full list of expenditure categories, see Consumer Expenditure Survey Table 1800. Texas immigrants earned nearly \$119 billion in wage, salary, and self-employment income in 2015.
